## ORDERING INFORMATION

All Mopar® vehicle care and maintenance products may be ordered via the normal Mopar Parts ordering functions on DealerCONNECT.

Mopar vehicle care and maintenance products are stocked at Mopar Parts Distribution Centers (PDC) and also SSD/Supplier Ship Direct.

**The Workplace Hazardous Materials Information System (WHMIS)** is Canada's hazard communication standard. The key elements of the system are cautionary labelling of containers of WHMIS "controlled products," the provision of material safety data sheets (MSDSs) and worker education programs. WHMIS is implemented through coordinated federal, provincial and territorial legislation. Supplier labelling and MSDS requirements are set out under the Hazardous Products Act and associated Controlled Products Regulations. The Hazardous Products Act and its regulations are administered by the Government of Canada Department of Health, commonly referred to as Health Canada. The Controlled Products Regulations establish a national standard for the classification of hazardous workplace materials. In addition to setting out criteria for biohazards, chemical and acute hazards, the regulations specify criteria for chronic health hazards including mutagenicity, carcinogenicity, embryo and reproductive toxicity, respiratory tract and skin sensitization. Each of the thirteen provincial, territorial and federal agencies responsible for occupational safety and health have established employer WHMIS requirements within their respective jurisdiction. These requirements place an onus on employers to ensure that controlled products used, stored, handled or disposed of in the workplace are properly labelled, MSDSs are made available to workers, and workers receive education and training to ensure the safe storage, handling and use of controlled products in the workplace. WHMIS balances workers' right-to-know with industry's right to protect confidential business information and includes a mechanism for ruling on claims for exemption from disclosure of confidential business information as well as appeals to these rulings. Workers who may be exposed to hazardous materials in their jobs must receive training regarding the hazards of these materials and the WHMIS system. The employer must ensure so far as is reasonably practicable that the instruction and training provided to a worker results in the worker being able to apply the information as needed to protect the worker's health and safety. The primary objective of the training program is to ensure that workers understand the hazards of the materials they are exposed to, and the measures they should take to protect themselves. In order to achieve this objective, instructors must be knowledgeable of the processes and hazards of the workplace, and the WHMIS ments.

For a summary of the WHMIS employer requirements, please go to:

Mopar recognizes that hazardous materials pose a risk to health, safety and the environment when being transported. Mopar strictly complies with all WHMIS Regulations to ensure both a high level of security and employee safety when shipping our products. Mopar's commitment to WHMIS compliance includes providing the appropriate packaging and labelling to ensure proper shipping of our products.

It is important that you understand your responsibilities as an employer/shipper and the consequences of failing to comply with federal WHMIS Regulations when shipping or returning vehicle parts and maintenance products to Mopar. By strictly adhering to requirements, you will be able to safely and properly ship any returned parts or maintenance products to Mopar. For more information on compliance requirements, please visit the WHMIS Website at: <http://www.hc-sc.gc.ca/ewh-semt/occup-travail/whmis-simdut/index-eng.php>

### “Vendor Managed Inventory” Bulk Oil Program Participation Agreement

Our dealership wishes to participate in the Mopar Bulk Oil “Vendor Managed Inventory” Program. Through VMI, Shell Lubricants or an authorized distributor manages the inventory of bulk products. The intent of VMI is to ensure that the bulk oil product is always available for your dealerships by regular replenishment to refill tanks to their allocated tank capacity.

#### VMI Program Details

- FCA Canada Inc. (Mopar) agrees to deliver a supply of bulk oil through Shell Lubricants Branded Distributors on a schedule to be established by dealership usage volume.
- Dealership personnel will be responsible for verifying the quantity of oil delivered and signing the appropriate delivery documentation.
- FCA Canada Inc. (Mopar) will bill the dealership for the amount of oil delivered.
- The dealership agrees not to refuse a scheduled delivery; dealership should advise Mopar/Shell if special circumstances exist.

#### Benefits for the customer

- Enhanced delivery efficiencies
- Elimination of order placement process for all products on VMI
- Elimination of need for customer to monitor tank levels
- Assurance that tanks will be maintained within proper allocation levels by the local distributor

## Customer Tank and Volume Requirements

- Must have their primary grade tank meet a minimum of 800 litres capacity. Additional secondary grades and tanks can be added to the program but must meet a minimum of 460 litres capacity.
- All bulk grades at the customer's location must be on the VMI program or the customer must place order via the Shell MarketHub web portal.
- No other products may be delivered to, or contained in the tanks listed in your Enrolment information form while you are enrolled in the Mopar Bulk Oil Delivery Program. Dealer must notify FCA Canada Inc. and Shell Canada if any changes are to occur.

## Non-VMI Customer Bulk Oil Program Participation Agreement

If you do not meet all the requirements for VMI, you will be set up with access to Shell MarketHub for order placement.

- Minimum order quantities are 500 L total and 300 L per grade
- Order cut off time is 2 PM. Orders placed after 2 PM will have 1 working day added to the lead time.
- Standard delivery lead time is 5 working days. Extended lead times will exist for customers in remote areas. Orders must be placed using Shell MarketHub. For delivery status or order inquiries, please contact the Shell Customer Care Team via phone, fax or email at:
