

2016 GUIDE D'APPLICATION DES BALAIS D'ESSUIE-GLACE

Mopar® et des pièces Magneti Marelli offertes par Mopar.

**MAGNETI
MARELLI** MD

Offert par:
MOPAR MD

BALAISS D'ESSUIE-GLACE MOPAR^{MD} BEAM

Performance supérieure toute saison

- L'enduit scelle le becquet aérodynamique et le protège contre les intempéries, pour une performance toute saison accrue
- Puisqu'aucune de ses pièces ne sont exposées, les balais essuie-glace Mopar beam résistent à l'accumulation de neige et de glace, offrant un excellent rendement dans des conditions hivernales
- Surpasse les balais traditionnels dans les tests de balayage de la neige et de la glace

Profil aérodynamique

- Le becquet réduit l'effet du vent à haute vitesse
- Assure un fonctionnement plus silencieux avec moins de frottement
- Style moderne et épuré pour les véhicules d'aujourd'hui

Installation facile

- Est muni d'un connecteur préassemblé permettant d'accueillir les types de bras d'essuie-glace les plus populaires, et ce, tout droit sortis de l'emballage

BALAISS D'ESSUIE-GLACE POUR L'HIVER MOPAR

Balais d'essuie-glace technologiques pour les conditions hivernales extrêmes

- Gaine protectrice en mélange de matériaux synthétiques
- Conception courbée qui permet de débayer les accumulations de glace et de neige poudreuse
- Technologie de raccord SWIFT^{MD} facilitant l'installation par temps froid

Revêtement en mélange de matériaux synthétiques

- Extrêmement flexible, elle protège les composants essentiels des essuie-glaces contre les intempéries
- Empêche le vent de soulever les essuie-glaces
- Structure intégrée qui assure une étanchéité contre les intempéries

Fabrication robuste

- Lame en mélange de matériaux synthétiques de calibre supérieur
- Joint extérieur protecteur
- Fabrication renforcée

Lame flexible monopièce

- Pression des lames uniformément répartie afin d'assurer un balayage uniforme, propre et constant
- S'adapte parfaitement au pare-brise
- Conception mince et épurée qui maximise le champ de vision

BALAI D'ESSUIE-GLACE MAGNETI MARELLI OFFERT PAR MOPAR_{MD}

- Les balais naturels en caoutchouc sont recouverts d'un enduit anti-UV pour améliorer la qualité du balayage, réduire le bruit et protéger des rayons lumineux ultraviolets dommageables
- Testé et approuvé par les ingénieurs de FCA US LLC
